Sustainability Factors- Investments/IBIPs/Pension Advice

We take due care so that our internal remuneration policy with respect to investment or insurance advice on insurance-based investment products ('IBIPs') promotes sound and effective risk management in relation to sustainability risks and does not encourage excessive risk-taking with respect to sustainability risks.

When assessing products, we will consider the different approach taken by product providers in terms of them integrating sustainability risks into their product offering. This will form part of our analysis for choosing a product provider.

General insurance products

General insurance products, such as motor, home, travel, health, retail or liability insurance, are typically subject to a single or standard commission model, based on the amount of premium charged for the insurance product.

Profit Share arrangements

In some cases, the intermediary may be a party to a profit-share arrangement with a product provider and will earn additional commission. Any business arranged with these product providers on a client's behalf will be placed with the product provider because that product provider is at the time of placement, the most suitable to meet the client's requirements, taking all the client's relevant information, demands and needs into account.

Life Assurance/Investments/Pension products

For Life Assurance products commission is divided into initial commission and renewal commission (related to premium), fund based or trail (relating to accumulated fund).

Trail commission, bullet commission, fund based, flat commission or renewal commission are all terms used for ongoing payments. Where an investment fund is being built up through an insurance-based investment product or a pension product, the increments may be based on a percentage of the value of the fund or the annual premium. For a single premium/lump sum product, the increment is generally based on the value of the fund.

Life Assurance products fall into either individual or group protection policies and Investment/Pension products would be either single or regular contribution policies. Examples of products include Life Protection, Regular Premium Life Assurance Investments, Single Premium (lump sum) Insurance-based Investments, and Single Premium Pensions.

Investments

Investment firms, which fall within the scope of the European Communities (Markets in Financial Instruments) Regulations 2007 (the MiFID Regulations), offer both standard commission and commission models involving initial and trail commission. Increments may be based on a percentage of the investment management fees, or on the value of the fund.

Credit Products/Mortgages

Commission may be earned by intermediaries for arranging credit for consumers, such as mortgages. The single, or standard, commission model is the most common commission model applied to the sale of mortgage products by mortgage credit intermediaries (Mortgage Broker).

Clawback

Clawback is an obligation on the intermediary to repay unearned commission. Commission can be paid directly after a contract is concluded but is not deemed to be 'earned' until after a specified period of time. If the consumer cancels or withdraws from the financial product within the specified time, the intermediary must return commission to the product producer.

Fees

None.

Preferred Provider Rate

None.

Other Fees, Administrative Costs/ Non-Monetary Benefits

The firm may also be in receipt of other fees, administrative costs, or non-monetary benefits such as:
Attendance at product provider seminars.

Promotional items.
